

Branch: Civil engineering

Code: CIECPM

Option: Civil Engineer-Construction Project Management

Level: Bachelor

Prerequisites: Scientific baccalaureate or equivalent

Opportunities :

PROPERTY MANAGER: MANAGEMENT OF INFRASTRUCTURE FACILITIES

As a property manager in infrastructure management, you are primarily responsible for communication with customers. You will deal with clients from the trade, industry, hotel or public sector in the field of building cleaning. You are also responsible for quality assurance on site and for the cleaning teams. You will also be responsible for optimizing warehouse logistics and material purchasing as well as employee training.

SALES MANAGER: IN FACILITIES MANAGEMENT

Your job as a sales manager in the industry is versatile and exciting, as you need to lead your employees well and have a certain talent for organization. You are mainly responsible for managing the purchase of consumer goods and organizing the use of external service providers. You delegate various tasks, from cleaning windows and interiors to maintaining electrical systems.

facility management. You ensure the functionality and optimize the services around buildings and facilities. At the same time, you use your experience to create efficient concepts for making even better use of the entire life cycle of facilities, including the technical infrastructure.

The larger the building, the more it needs experts like you. The Bachelor of Facility Management program at UUT will provide you with the necessary skills. You will acquire comprehensive knowledge in the fields of property, facility, object and workplace management. Above all, commercial and professional aspects are taken into account.

The development and control of strategic measures as well as the efficiency of work processes and organizational structures are also part of the program.

Specific competences:

After successfully completing your Bachelor of Facility Management, you will be able to coordinate the technical and infrastructural services of facilities with confidence.

Quality and competences:

Would you like to do even more? Then you can specialize in certain areas during your studies. For example, in industrial facility management, real estate valuation and financing or real estate law. The advantage: after your studies, you can direct your career in such a way that you work as a facility manager yourself or take over the coordination of a team.
