

Branch: Architecture

Code: INTDES

Option: Interior design

Level : Bachelor

Prerequisites : Scientific baccalaureate or equivalent

Opportunities :

With your interior design studies, you have enough room to develop freely. For example, in planning offices, industry or trade, as well as in shop design, stage design, trade fair construction and marketing

INTERIOR DESIGNER: IN THE PLANNING OFFICE

As an interior architect in a planning office, you are responsible for working on design projects for private and public clients. From the preliminary design to the final building inspection, you will accompany your projects through all phases of service. In doing so, you can use your creativity in design and demonstrate your organizational skills in managing large projects.

INTERIOR DESIGNER: IN INDUSTRY OR COMMERCE

If you work as an interior designer in industry or commerce, you focus on advising and planning for the products of the company or trading house, for example furniture, lighting, kitchens. You use your design skills to make shopping a sensual experience and to highlight the specific qualities of the products.

INTERIOR DESIGNER: IN THE FIELD OF SHOP FITTING / STAGE DESIGN / TRADE FAIR CONSTRUCTION / MARKETING

As an interior designer, you can also work in marketing-oriented activities at the interface between graphic design, interior design and, for example, fashion. Your challenge is to create commercially active and demand-oriented brand

Description

The curriculum of the UUT Interior Design program is clearly focused on designing and writing creative spatial concepts. And therefore also your creativity. You will acquire a lot of basic knowledge in the fields of architecture, design, layout and contract management. At the same time, we train your spatial perception with numerous practical exercises, as well as your presentation skills with photo, video and online tools. This includes, among other things, editing and presenting 2D or 3D drawings using analogue tools and digital solutions.

Specific competences:

Transforming simple spaces into modern living and working environments - do you think you can do it too? Then combine your creative talent and sense of style with technical know-how with your degree in interior design at UUT. Learn theoretically and practically what is important in the planning, implementation and design of spatial concepts in terms of functionality, material selection and technical comfort. In this way, you will be able to transform a wide variety of spaces into unique atmospheric rooms. Whether for shopfittings, trade fair stands, offices or private objects, there are no limits to your creativity.

Quality and competences:

. At the end of your studies, as a Bachelor of Interior Design you will be able to develop your own individual style on the basis of sociological approaches to architecture as well as various design and planning methods. And thus decisively shape the spatial concepts of the future.
