# Branch:Computer Science

Code: MANINF
Option: Management informatics
Level: Master
Prerequisites:
Opportunities:
IT SERVICE MANAGER/IN
As an IT service manager, you look for solutions to problems in the areas of IT. You eliminate errors and mistakes in the IT department and are the contact person for IT problems. Depending on the employer, customer advice and sales may also be part of your area of responsibility. IT PROJECT MANAGER
As an IT project manager, you plan, organize and manage IT projects. In doing so, you coordinate all employees, departments and external service providers involved. During implementation, you always keep an eye on the schedule and budget. You are not only responsible for the correct implementation, but also for the achievement of the objectives.
IT CONSULTANT
As an IT consultant, you advise companies on IT projects. For example, you support the implementation of a cloud infrastructure or the introduction and maintenance of IT systems. You accompany projects from planning to implementation. Your goal: to improve applications and processes and thus make IT-supported workflows more efficient.

Description:
